**Subject:** RTK sewer survey

RTK Officer,

In light of the fact that a supermajority of the residents of the Hickory Hill/Worcester Acres development are in the process of petitioning the Board for a change in the current plan from the Low pressure/grinder system to the traditional gravity system, I would like the following,

1. Copies of the most current and/or final results of the "survey" done for the Component 3m for Hickory Hill/Worcester Acres/Center Point residents regarding the preference of a traditional gravity system vs. low pressure and grinder system.
2. Copies of the online survey done for the Component 3m for Hickory Hill/Worcester Acres/Center Point residents regarding the preference of a traditional gravity system vs. low pressure and grinder system.
3. Copies of the supporting documentation, i.e. the survey forms, submitted to support the final results of the most current and/or final results of the "survey" done for the Component 3m for Hickory Hill/Worcester Acres/Center Point residents regarding the preference of a traditional gravity system vs. low pressure and grinder that "led to the engineer's final recommendation for the low pressure system".

If the results are available in electronic form and/or pdf this would be preferable format and under RTK would have to be provided.

Please scan and send via email.

Thanks

Jim Mollick
