## **Solar Panel Roof Mount Systems**

### **Building Permit Submittal Guidelines**

#### **1. Building Permit Required**

A building permit is required for roof mounted solar panels systems. The purpose is to insure the proposed mounting and roof construction meets the required 90 miles per hour wind resistant requirements within the International Building Code (ICC). The application submittal shall include construction plans signed and sealed by a registered architect or engineer.

#### **2. Electrical Permit Required**

An electrical permit is required for roof mounted solar panel systems. The purpose is to insure the proposed solar electrical system meets the requirements of the ICC Electrical Code. The application submittal shall include signed and sealed plans approved by an electrical underwriter.

#### **3. Solar Panel Equipment Unit Cut Sheets Required**

All solar panel roof mount building permit application submittals shall include manufacturer cut sheets for all proposed equipment. The purpose is to insure the equipment meets the 90 miles per hour wind resistant requirements within the ICC.
